Clicker Docs

Clicker Docs transforms the iPad into a portable primary word processor! Watch your pupils’ skills and confidence grow as they use the range of writing support tools on offer to create accurate, flowing documents.

Review writing with clear speech

Pupils use the child-friendly lower case keyboard to type into Clicker Docs, and when they punctuate a sentence their work is read back to them, with each word highlighted as it is read. This helps them to find and correct errors for themselves, so that they become more independent writers.

Increase writing productivity and accuracy with word prediction

The Clicker Docs predictor suggests age-appropriate vocabulary based on the context of pupils’ writing. The predictor encourages pupils to use more adventurous vocabulary, consistently reinforces the correct spellings of the words they wish to write and really helps to speed up the writing productivity of children who struggle to transfer their ideas to the page.

Provide subject-specific writing support with Word Banks

Word Banks provide tabbed vocabulary support for any subject or topic. Children simply tap a word to add it to their document. As with the document and the predictor, Word Banks are completely speech supported – use our unique Sound Shift tool to listen to a word before using it. It’s so easy for teachers to create a Word Bank in Clicker Docs, organised with either alphabetical tabs or topic tabs.

Personalised support for every pupil

Change how the app looks and acts to meet each child’s learning needs. Available options include changing the speed and frequency at which Clicker Docs speaks, customising the word predictor level and using high contrast colour schemes.

Only Clicker Apps offer all this:

Designed with the classroom in mind

The child-friendly interface, lower case keyboard and Sassoon font create an engaging environment for your pupils to work in. Customisable settings make Clicker Apps accessible for a wide range of pupils.

Free resources at your fingertips

Access topic-specific Sentence Sets and Word Banks created by our curriculum team, searchable within the app. New resources added every two weeks!

Clicker 6 compatible

Clicker Apps and Clicker 6 are able to ‘talk’ to each other. Create activities within Clicker 6 and then export them to your iPads, or open your pupils’ Clicker Apps files in Clicker 6.

Please see the App Store for latest device specification.
